

# +object

a catalogue of uncommon objects  
made by uncommon people

# About +Object

We produce items from glass and call them art objects because we combine new technologies and design which are individual for every project.

Pieces of art of +Object are practical and can organize all the space around. Having got the wide range of colors and textures our products can be used in different interior design.

In the manufacturing laboratory we often develop new model range and implement innovations for next collections.

Our showrooms: Ukraine, Switzerland, the United Arab Emirates, Great Britain.

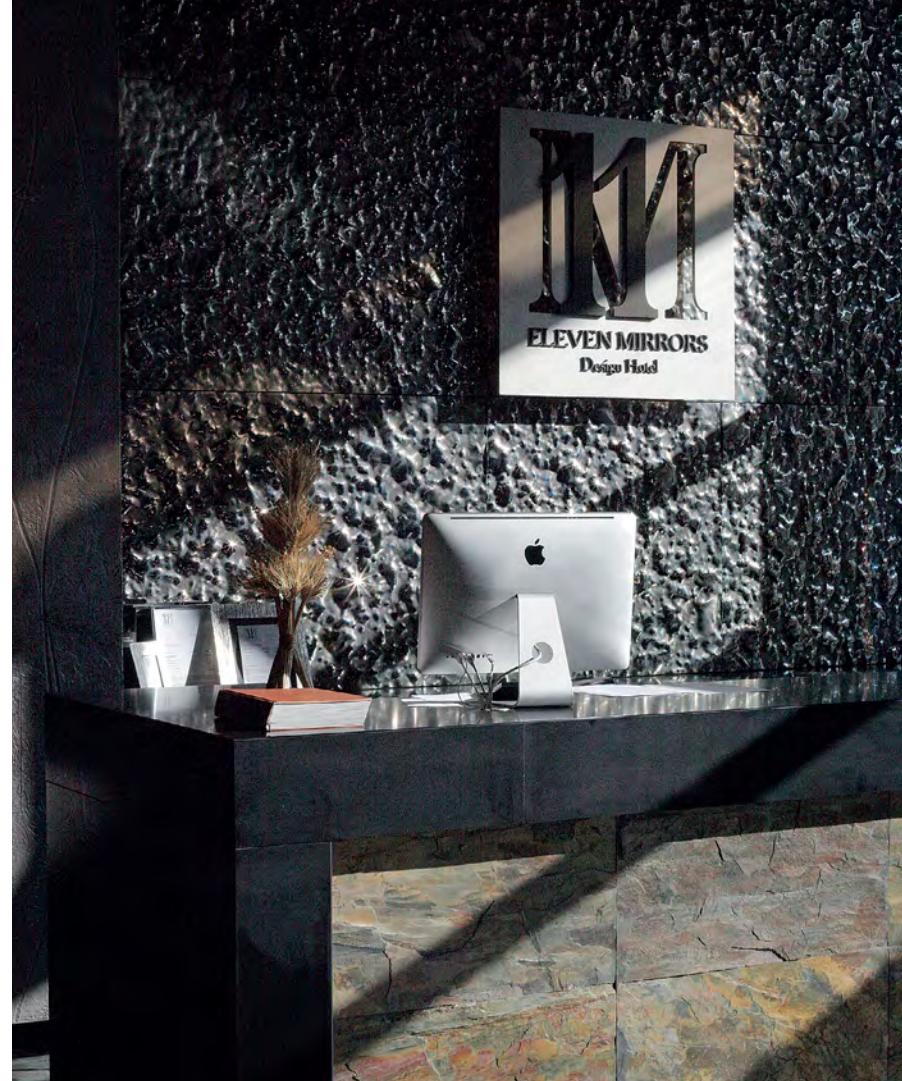

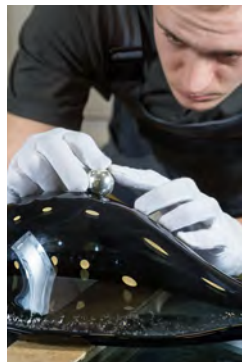

# Manufacturing

+Object items produced with the use of unique technological development.

Such as glass melting with titanium coating, enhanced application of colors and textures, fixation of necessary colors.

Our designers, Ihor and Serhii Fomichov, have been working for more than 25 years in their own workshops which led to the development of dozens of authors' technologies of glass processing which are now used in the production of exclusive items of +Object.

Every product Ihor and Serhii produce thinking about their clients.

# What we do

Even the most ordinary everyday items we produce as art objects.

It is hard to imagine that glass can look like something bright and amazing.

But products which are made with the use of author's technology of our designers are the direct proof of that.

Our specialization: vases, dishes, furniture, wall décor, mirrors, wall panels.

Mirrors

# Individual Design

Are details important in design? Definitely! That's why our main goal is not to produce item of décor but to create art object with its own history.

Having ordered the individual design, you receive the real piece of decor produced by our designers Fomichov Brothers. They manufacture products which are not only convenient but also look amazing in different interiors.

Every object which are produced according to the individual order is born in combination of fire, gravitation and time.

Our designers Fomichov Brothers surprise everyone with their pieces of art. The main function of design is aesthetics: "The beauty that is the function".
