

PROJECT PORTFOLIO

The business was formed 3 decades ago, and it has seen a number of changes and development over this time. This, of course, is natural with any business spanning this time frame. The goal was and always been about commitment. commitment to our products, commitment to our customers and commitment to our team. The residential market has always been our fate, however in order to cater for the need at the time in 2008, we started to direct our focus toward the commercial market. Until today we continue to do so and look forward to a complete solution for the hospitality sector for the walls, floors, and fabrics.
